What Is Panelux?

Panelux is an exciting new Lighting Technology which was developed here in Australia (Provisional Patent no 2011903230), Panelux will be Manufactured locally. Panelux is a 20mm and 26mm thick structural Panel & has an extensive range of applications in the Retail, Commercial and Domestic markets & beyond, as an alternative to Fluorescent Lighting. In addition, Panelux is Maintenance free & will significantly lower your Power Consumption thereby reducing your carbon footprint & assisting to achieve a greener future.

Why Use Panelux?

Panelux uses Innovative LED Technology to achieve even light Distribution across even the widest standard Panel (2440mm x 1220mm). Panelux Panels are lighter, safer & more efficient than products that use traditional Fluorescent Tubes. Light is emitted from both sides of the Panel allowing for multidirectional lighting applications. Panelux has a wide range of standard sizes as well as Customised sizes to suit your particular requirements.
